11/10/2025	v3.0	Third call modifications	C3

Execution summary

As no requirements had to be analysed, no analysis has been carried out in the document.

Introduction

The following is the analysis report of the first deliverable of the Student #3. It will address the requirements they demanded, a detailed analysis on their approach, the possible decisions to be considered and the selected option.

Contents

The complexity of this delivery was low and no major obstacles were encountered, resulting in no major decisions being taken.

Conclusions

Since no analysis has been carried out in relation to the decisions I have taken on any of the requirements requested in this deliverable, the only conclusion that can be drawn is that its complexity is low, that what was requested was well drafted, and that I have understood all the requirements in the same way, thus having a unified approach.

Bibliography

Intentionally blank.
