Executive Summary

In this document a brief description of the formation of the group will be presented. In addition, information about the individual members and confirmation of active participation and work in the project and in the group's tasks in general is added. The level of commitment of the team members, established good and bad practices, and their respective rewards and sanctions are recorded.

Introduction

This document will contain the information corresponding to the members of the group, the objective and commitment to the subject Design and Testing II, the procedure that we will take in the case of good or bad work done by each member of the team, as well as the expulsion, if any, of a member of the group and indicate the performance of the work done by each representative.

Contents

Team training and information
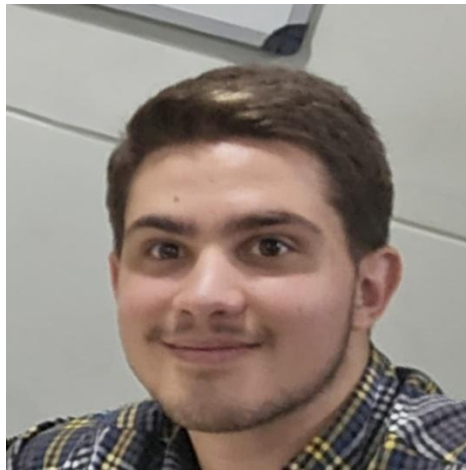

The team consisted of 5 members.

The members are as follows:

Isabel Sánchez Castro (isasancas@alum.us.es)

Javier Aponte Pozón (javapopoz@alum.us.es)

Paula María Suárez Linares (pausualin@alum.us.es)

Jose María Portela Huertas (josporhue@alum.us.es)

Julia Virginia Ángeles Burgos (julangbur@alum.us.es)

Recruitment process

Using the subject recruitment method, one of the members expressed his intention to create a team, explaining his objectives and way of working. The other participants agreed and contacted the colleague through the [forum](#) to express our desire to belong to the team. Subsequently, he accepted the proposal and we created the working team.

Declaration of commitment to work

We declare and commit ourselves as a team to work together, to support each other in any doubt, to communicate in advance to the rest of the members any unforeseen event/problem that may arise both at educational and personal level in order to be able to provide help and that the tasks are not blocked, continuing with another colleague and restructuring the initial planning for each delivery so that the obligatory tasks can be carried out as a minimum.

The primary objective of this project is to successfully complete all requirements and deliverables to meet the course criteria, ensuring a passing grade and demonstrating a comprehensive understanding of the subject matter. Additionally, if the team finds itself capable, we may expand our goals and strive for a higher level of achievement.

Performance indicators

The evaluation of the performance of the team members, which is based on the percentage of completed tasks with respect to the tasks assigned in the GitHub project panel, is classified as passed and not passed. In order to obtain a passed evaluation, all the assigned tasks must have been completed, so if any of them is presented as incomplete or not done, the evaluation will not be passed.

In this team, collaboration and commitment are promoted, values that are reflected in actions such as meeting deadlines or providing support when needed. On the contrary, negative attitudes such as not carrying out assigned responsibilities, not offering help when needed and, in general, not contributing to the requirements to tackle the project are rejected.

We establish the definition of done when one of the GitHub tasks corresponding to each of the items in the group document has been completed.

Rewards

As a team we have decided that every member who performs their assigned tasks correctly and on time according to the due date of the assigned task will receive good feedback from the other members, so that they feel valued and rewarded for their efforts.

Warning

We declare that if there is a problem with any member of the group, they will be given a warning by the rest of the classmates and if it continues the same or worse, the corresponding tutor will be notified so that they are aware that there are problems and that we are having difficulties for the correct functioning of the subject.

Expulsion

If the problem mentioned in the Warning section persists until it becomes a hindrance to the rest of the teammates, we will take the decision to expel the student from the team, being aware of the repercussions of this and we will let the teacher know so that he/she can make his/her own decisions regarding the student.

Conclusions

We consider it essential to clarify and document our commitments to the team in the event that any of the participants do not comply with the agreement, allowing us to resolve any issues smoothly in the future.
