PLANNING REPORT

1. Revision Table

Date	Version	Description
19/02/2025	v1r0	Creation of the document

2. Execution summary

All assigments were successfully completed.

3. Introduction

The purpose of this section is to present and detail the tasks assigned to Student#4, their progress, as well as the estimated and planned time and value for each of them. A table containing the tasks, their assignment, and expected duration shall be drawn up and compared with the actual values of time spent and the corresponding cost in euros according to the role performed.

My assigned roles are: Anaylist and Developer.

4. Contents

We use GitHub Project to define and track tasks, allowing a structured management of the assigned work. Through this tool, we organize and monitor the progress of each task, in addition we use clockify to track the time spent on each task. My own board has this link:

#ID	Title	Description	Assign	Estimate time	Actual time spend
4	Task 1 - Student 4 - Mandatory	Modify the anonymous menu so that it shows an option that takes the browser to the home page of your favourite web site.	Paula María Suárez Linares	15 minutes	13 minutes
20	Task 2 - Student 4 - Mandatory	Provide a link to your planning dashboard in GitHub to review the tasks, their current status, and your schedule	Paula María Suárez Linares	10 minutes	5 minutes
21	Task 24 - Student 4 – Suplementary II	Produce an analysis report.	Paula María Suárez Linares	20 minutes	18 minutes
22	Task 24 - Student 4 – Suplementary II	Produce a planning and progress report	Paula María Suárez Linares	30 minutes	33 minutes

PLANNING REPORT

Estimate costs

Paula María (Analyst)   30.00€/h * 1 h 15 min =   37.50 €

Total Estimated Cost =   **37.50 €**

Actual costs
Paula María (Analyst)   30.00€/h * 1 h 09 min =   34.50 €

Actual Cost =   **34.50 €**

Linear amortisation (3 years): The annual amortisation is €100.

5. Conclusions

In conclusion, the work has been carried out correctly and efficiently, meeting the established objectives. The tasks have been properly tracked through GitHub Project, which has allowed an organized and transparent management.
